ABOUT US

At CDfs, our mission is to bridge the gap between what clients know and what they need to know to be effective, we do this by connecting people to technology through educative and consultative measures. We are Australia's premier supplier of digital forensic tools, industry embedded training and certification to Law Enforcement, Government and Corporate Enterprise.

CORE CAPABILITIES

At CDfs we provide various software and hardware products along with the relevant training. Our capabilities include.

- Digital forensics and investigative tools
- Training certification
- Consulting

DIGITAL FORENSICS AND INVESTIGATIVE TOOLS

CDfs has the advantage of having subject matter experts and trainers to select the best digital and forensic investigative tools available both nationally and internationally. With years of experience utilizing and testing a multitude of tools, our team have a deep understanding of the products we provide.

TRAINING CERTIFICATION

CDfs offers two specific training methods:

Vendor Training: Due to our strong relationship with our vendors we offer the opportunity for our vendors to deliver their own training at our facility.

Vendor Agnostic Training: Vendor agnostic training is a holistic approach where we provide Vendor and Vendor independent trainings that provide the right balance for well-rounded practitioner development.

CONSULTING

At CDfs we take a holistic approach with our clients, we look at what a client needs and then we come up with a strategic plan to obtain the best outcome. Our consults are project specific to each client; we can do as little or as much as needed but our overall objective is to make the client self-sufficient moving forward.
