All ADF software shares the same intelligent search engine and rapid scan capabilities. The key differences in our digital forensic products are in the form factor and the features focused on deployment and usage scenarios:

Who Uses ADF Software?

- **Forensic Examiners** - Police, Government or Corporate Lab Investigations and Priority Triage
- **Field Investigators** - Police, Sheriff, Law Enforcement, School Resource Officers, IT Security and Digital First Responders
- **Intel or Military Field Operatives** - Force Protection and Field Intelligence Gathering

What are the differences between ADF products?

ADF provides you with three options to deploy forensic tools:
- Mobile Forensics typically used by field investigators
- Computer Forensics often used in the forensic lab
- All-in-One Forensics tools used by anyone that wants to have the power of a portable lab in the field

1. **Acquire -** Quickly identify and collect files and artifacts
2. **Analyze -** Data analysis to correlate people, events, and files
3. **Report -** Quickly generate and share court-ready reports

MOBILE FORENSICS

ADF makes collecting smartphone evidence easy thanks to mobile phone forensics tools. ADF mobile forensics software leverages artificial intelligence and machine learning to simplify complex digital evidence investigation tasks, helping organizations uncover actionable intelligence within seconds and minutes.

COMPUTER FORENSICS

ADF's flagship computer forensic software makes lab or field investigations easy for anyone responsible for collecting, analyzing, or reporting on computer evidence. Forensic examiners and field investigators can get Certified to use ADF computer forensic software in 1-2 days and can begin using out-of-the-box Search Profiles to find digital evidence on a Mac, Windows and Linux devices immediately.

ALL IN ONE FORENSICS

Our suite of PRO tools includes Digital Evidence Investigator® PRO (DEI PRO), Triage-Investigator® PRO (TINV RPO), and Triage-G2® PRO (TG2 PRO). Our PRO Series allows frontline field investigators to quickly preview, capture, and collect evidence from iOS, Android, Mac, Linux, and Windows using your forensic machine or an ADF rugged field forensic tablet.
